## eLite HRMS Payroll Software

**"Whatever your HR challenges may be, we have a solution customized for your business."**

The success secret of an organization is to have a competent core team along with the right equipment and software catering to every employee's professional needs.

### Organizational Chart

eLite HRMS Organizational chart module enables you to create a well-defined organizational hierarchy describing the positions and responsibilities to keep the workforce organized and informed.

### Employee Identification

Employee identifications such as contract details, family members and their contact details can be stored in this module. This allows the HR team to maintain good rapport with employees.

### HR Help Desk

With our eLite HRMS, employees queries, requests can be addressed through an integrated system based on priority.

### News & Notification

All Organizational announcements can be intimated to each and every end user by posting Notifications. End users task, reminders, to-do-list can be marked from end user ID so that an employee will not skip any of the delegated tasks.

### Attendance Module

Our eLite HRMS Attendance module allows employees to use his credentials to mark his attendance through a "clock in" and "clock out" function and HR department to track and analyze attendance records, especially for calculating the monthly salary.

### Leave Management Module

Our eLite HRMS leave management module keeps track of employee's leave management, regardless of whether it is SME or large enterprise.

### TDS Module

The eLite HRMS TDS Application Module allows the employee to plan his investment and other source of income detail. After the specified time frame, the edit option will be disabled and actual TDS will arrive and validated as per the tax slab of the employee.

### Payroll Module

eLite HRMS payroll module automatically calculates the pay for each and every employee and payslip will be generated. The eLite HRMS Payroll Module has an option to process the payroll for numerous times within the current month for an overview of payments and budget allocation. An unique key "Exit Payroll" is added to ensure that the data gets automatically saved which cannot be reversed.

### Payslip

### Mobile Application

eLite HRMS Mobile Application Module provides employees to access their own records using their credentials through mobile devices.

### Advantage of eLite HRMS

eLite HRMS application software is cost effective and works as a standalone application and can also be seamlessly interfaced with the existing applications (SAP R3, SAP B1, etc.).

# SAP ERP

## Enterprise Resource Planning

### SAP R3 - An Overview

SAP R/3 is one of the main products of SAP, where R stands for Realtime and the number 3 relates to three tier application architecture (Data base, Application Server and Client). It is the ERP (Enterprise Resource Planning) system that aims to integrate all the different modules (SD, MM, PP, FI, CO, HCM etc.), in the company. The integration results in consistency of data throughout the system and the company.

SAP R/3 Software is highly robust and has been developed using ABAP/4 as a programming language, SAP R/3 architecture is designed to support most of the open standards available today. It can run on UNIX, NT, AIX, Linux etc. All the components work in the coordinated manner.

### SAP Business One - An Overview

SAP Business One is built for small to medium sized businesses that have outgrown their accounting-only or legacy systems and are looking for a single, integrated solution to manage their entire business. SAP Business One provides executives and managers with instant access to critical business information so they can confidently make informed business decisions. It is a comprehensive solution that covers virtually all aspects of your business including finance, logistics/operations and customer relationship management.

## eLite SalesPro

 **SalesPro** - A web based SCM application software allows a company to organize and track the Direct and Channel Sales process efficiently. With its multiple configuration options SalesPro processes Goods Purchase, Inventory Control, Distribution, Accounting, Reports etc. effectively.

### SalesPro Functions

SalesPro generates purchase orders for the SKU's (Distributors) from the principal. Once the goods purchase is done, the goods are transferred to the inventory as stocks after the quality check at the SKU point. The damaged goods are returned by the SKU to the principal through a purchase return order generated by SalesPro.

SalesPro tracks each customer's order from order placement - dispatch – invoice, it also tracks accounting process of payments and receivables and allows making advance payments, creating credit and debiting note. SalesPro facilities returning of goods through the sales return process.

SalesPro can set direct and channel sales targets and the consolidated reports compiled by Salespro allows the management to have a better sales performance latitude.

Salespro also provides detailed and customized reports on inventory, distribution and accounting of customers and SKUs.

### SalesPro Advantage

SalesPro works as a Standalone application and can also be seamlessly interfaced with the existing legacy applications (SAP R3, SAP B1, etc.). SalesPro is cost-effective software which can be configured without any compromise on the existing applications.

## eLite IMS

*The primary function of IMS is to capture incidents like Enquiry, Requests and Complaints from the customers directly or routed through call coordinator. It allows the organization to analyze the reasons for non-conversion of enquiries to an order and helps in initiating course corrections.*

*Trigger's mails and messages to the respective stakeholders when an incident is created, assigned and completed.*

*Automatic escalation procedure is available when an incident is not resolved within the committed time.*

*SLA, Ticket Category or policies are customizable based on priority of the issue or request.*

*Multiple reports can be generated based on incidents both present and past, resolver's history and customer behaviour. The reports help the management to conduct root-cause analysis for any given issue and arrive at permanent solution.*

## eLite GPS Tracker

*An Android based Customized application facilitates true global tracking of individual employee's latitude and longitude position. This application helps the management to view the movements on a real-time basis and also facilitates the recording of business conversations between the organization's employee and the prospective client.*

*The route scheduler allows the manager to professionally map the travel route of the employee on a daily basis. This 24/7 tracking system facilitates generation of real time reports on employee movements from any remote location and the access to generate and view the reports are rights based.*

*The Elite tracker application which is IMEI based does not allow sim card change and ensures that no additional software is downloaded or installed. The user device (Tablet, Smart phones) can be locked remotely in the event of theft or loss from being misused.*

### Benefits:

#### Real Time Tracking

*Our real time tracking software facilitates true global tracking of individual employee's latitude and longitude position. This tracker application helps the management to view the movements on a real-time basis*

#### GPS TRACKING APP

*IMEI based GPS tracking system does not allow sim card change and ensures that no additional software is downloaded or installed. This 24/7 tracking system facilitates generation of real time reports on employee movements from any remote location*

#### Route Optimization

*The route scheduler allows the manager to professionally map the travel route of the employee on a daily basis. Provides access to generate and view the reports on rights based.*
